

FAILURE ANALYSIS

INTRODUCTION

Failure analysis is a critical component of product improvement systems. When a product fails prematurely in service or in testing, failure analysis is conducted to determine the root cause and the basic material behaviour that result in the failure. This course presents a very practical approach to failure analysis for the non-metallurgist. It gives a comprehensive overview of the technique and its fundamental sources of failures.

TRAINING COURSE CONTENTS

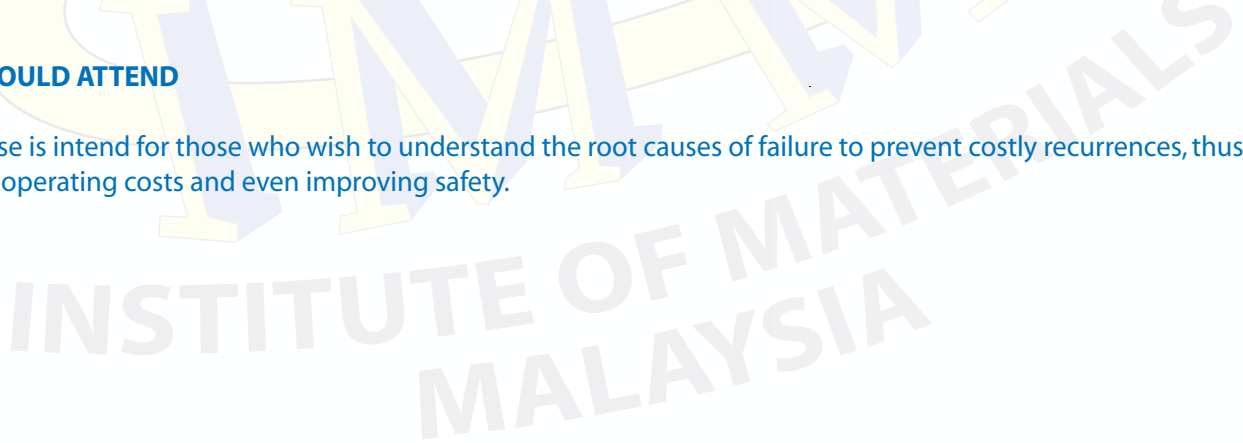

- General procedures for Failure Analysis
- Identifying and preserving evidence
- Types of failure
- Method of examining failures
- Case Studies

DURATION : 1 day
9.00 am - 5.00pm

Description	Fee
Course Fee	RM 800.00

WHO SHOULD ATTEND

This course is intend for those who wish to understand the root causes of failure to prevent costly recurrences, thus lowering operating costs and even improving safety.

Registration Form

Company Name: _____

Company Address: _____

Telephone No: _____ Fax No: _____

Person in Charge: _____ Email Address: _____

Participant Information:

No	Participant/s	IC / Passport No.	HP No.	Fee

Payment Mode

Payable To: Materials Technology Education Sdn Bhd
(Add on 0.50 cents or 3% commission for outstation cheque)

Direct bank-in

Banker: Hong Leong Bank Berhad
Account No: 00100311204

Kindly fax to 03-5882 3524 the copy of cheque and bank-in slip once payment made.
